# It Takes More Than a Green Thumb

CAN you imagine germinating radish seed in three minutes time? It can be readily done in the laboratory. Such curiosities of knowledge seem useless to us when we hear of them. But some smart man will come along and put this fact together with some problem at hand, to make a small fortune for his cleverness. We should keep alert to any odd piece of information about our plants — toy with these ideas, twist and turn them in various ways — to find a paying application.

We know of a man who went to Venezuela to collect orchids, but what he brought back of most value was not the plants, but a small bit of information. He discovered that the orchid he was interested in, grew naturally in a location where the night temperature dropped to 35 degrees. According to all the authorities, at least, 65 degrees were necessary for this orchid. Needless to say, he stole a quick and quiet march on his competitors by applying his finding.

Sometimes we think that the most fascinating thing about the florist business is the fact that there is so much to know and learn, and the situation where a small idea will give you a weighty advantage over your neighbor. So, we say, keep your eyes and ears open to all ideas — and then use them to improve your crop and profit.

## BUSINESS TERMS

2%, 10 DAYS, 60 DAYS NET FOR CUSTOMERS OF APPROVED CREDIT

Prices in this catalog are subject to change without notice. . . . All goods are offered subject to Crop Failures, Shortages or other causes beyond our control, and to being unsold on receipt of order. . . . The prices in this catalog are for the trade only. For your own protection do not loan this catalog to anyone not entitled to Florists or Wholesale prices. . . . Unknown correspondents desiring to open an account are requested to furnish three trade references with whom they have had credit relations.

Fred C. Gloeckner & Co., Inc. warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container within recognized tolerances. Seller gives no other or further Warranty, expressed or implied.

In addition to seed, *Gloeckner* bulbs, plants and cuttings are selected with diligent care as to type, productiveness and freedom from disease so you may have the best upon which to build your prospective crops.

### COVER MAN 1951

Mr. Matthew Cunningham, born County Derry, Ireland, in 1884. He first came to this country in 1904 and began work on a private estate in Canada where he stayed for one year. He then came to the Edwards Floral Co. in Atlantic City where he worked for a period of 26 years. In 1929 he and Mr. Gustav Carlson formed their own business at Bargaintown, N. J., and have been operating under the name of the C & C Nursery. This has been a most efficient and very neatly run company ever since. Mr. Cunningham retired from active business in 1949, but still puts in a full day's work. He turned over the active management of his portion of the business to his son, Mr. Jack Cunningham. Mr. Cunningham is a genial personality, and his lifetime of knowledge of growing places him among the top men of the old guard. We salute Mr. Cunningham.

# Outstanding Flower Seeds

## That Deserve Special Consideration

*Phlox Gloeckner's Strain*

**PHLOX**

*Gloeckner* Strain Mixed

This is an exceptionally dwarf strain of phlox especially adapted to pot culture for spring sales. The mixture of colors is well balanced and bright, with fine individual flower heads.

This strain has been well tried in many localities as we have had it for a number of years in very limited quantities. Once you have tried this strain you will always sow it in the future.

Tr. Pkt. \$1.00    1/4 oz. \$2.00    1/2 oz. \$3.50    Oz. \$6.00

**MARIGOLD**

(Dwarf Single French)

**SUNNY**

Similar to Flash but with single clear yellow flowers.

Tr. Pkt. \$.40    Oz. \$2.00

*Marigold Sunny*

**VERBENA**

*Gloeckner* Strain Mixed

Here too, is a fine mixture of dwarf Verbena making a fine companion for the Phlox for spring bedding plant sales. The plants are very dwarf in habit and have a splendid range of colors containing many of the eyed types through the mixture. This is an excellent dwarf Verbena especially adapted to growing in 2 1/4" and 3" pots.

We are sure once you have grown this strain you will not be without it in the future.

Tr. Pkt. \$1.00    1/4 oz. \$2.00    1/2 oz. \$3.50    Oz. \$6.00

*Verbena Gloeckner's Strain*

**BEGONIA SAGA**

Extra dwarf and dense growth. The Luminosa red flowers are freely produced.

Tr. Pkt. \$1.25    1/64 oz. \$4.00    1/32 oz. \$7.50

# Outstanding Flower Seeds That Deserve Special Consideration

**TITHONIA TORCH**

This orange red Tithonia grows as easily as a Zinnia. Height is about waist high and flowers from August until frost.

Tr. Pkt. .40      ¼ oz. 1.00      Oz. 3.00

**ASTER — PRINCESS TYPE**

Like all of the Princess these new additions are wilt resistant.

**CINERARIA**

*Siter's Hybrids*  
TRADE MARK

This is an early new group of Cineraria hybrids, blending for a perfect color combination from the bright eye types through the finer pastel shades. These new types carry large flower heads with medium, large individual flowers. They are a distinct improvement over the original Siter's Strain; and because they are hybrids, cannot be offered by anyone but the originator.

**We Can Supply You With Any Variety Not Listed Above**

Seed should be sown late in June or early July for Winter flowering. High temperature inhibits germination of the seed and one must, therefore, select a cool location for the flats.

Damping off is a serious problem and all precautions should be taken to avoid it. The soil should be sterilized with steam or other efficient measures and after the seed germinates good circulation of air and very little watering will help to prevent this trouble.

<b>Scandinavia</b> — Free flowering. Bright rose pink .....	1.00	2.75	5.00
<b>Tuberous Rooted Mixed</b> — Camelia flowered double type ...	2.50		

Soil to be used for seed flats should have two parts leaf mold, two parts well rotted manure, two parts soil and one part sand. Steam sterilize the flats and soil about one week before sowing, also water the soil well before sowing. For four inch plants for Spring sale sow seed in August. If 2¼ inch plants are wanted for Memorial Day, sow seeds in December. Many growers make monthly sowings from August to March.

For potting soil use the same mixture as above but add more soil and a three inch pot of Electra or complete fertilizer, to 2½ bushels of soil.

Begonia seed will germinate better in a temperature of 60-70° F. Grow Begonias in 55° temperature. Mite, Nematode and Aphis are sometimes troublesome.

*Calendula*

August sowing will flower from December to February. Early October sowing to follow Chrysanthemums, will bloom in February and March, while January sowing will bloom in April and May.

	Tr. Pkt.	1/4 oz.	Oz.	1/4 lb.
Ball's Gold—Long stemmed, deep golden yellow	.40	.60	\$2.00	\$6.50
Ball Long Orange Improved—Bright orange with light eye. The extra large flowers and long stems make an outstanding variety	.40	.60	2.00	6.50
Ball Orange—Glowing orange	.40	.60	2.00	6.50
Ball Supreme—Orange with dark brown center; unusually free flowering	.40	.60	2.00	6.50
Lemon Queen—Deep lemon yellow with dark brown eye. Contrasting colors make this yellow variety very effective	.40	.60	2.00	6.50
Masterpiece—Long stemmed, clear orange flower with dark center	.40	.60	2.00	6.50
Orange King—Dwarf bedding variety deep orange with dark eye	.15	.35	1.00	
Sensation or Campfire Improved—Brilliant orange scarlet sheen	.40	.60	2.00	6.50

*Calceolaria*

The soil used in germinating the seeds should be made up of two parts leaf mold, two parts well rotted manure, two parts soil, and one part sand. Sterilize the soil and flat with steam to eradicate all disease.

Sow the seeds lightly over the surface and cover the flat with a suitable covering. Calceolaria will germinate better when the temperature is cool, therefore, well shaded locations are better. August sowing will make large plants for May while November sowing will make good four inch plants. Some growers have used the wick irrigation method to germinate the seed with very good results.

**GILBERT'S STRAINS**

This is an improvement over the original Multiflora Nana type. Compact habit of growth; good selection of colors in the mixture; excellent foliage.

	Tr. Pkt.

# Cineraria

## Siter's Hybrids

Trade Mark

They are a distinct improvement over the original Siter's Strain, and because they are Hybrids from original crosses, cannot be offered by anyone but the originator.

This is an entirely new group of Cineraria Hybrids, blended for a perfect combination of colors, ranging from bright-eyed types through the finer pastel shades.

These new types carry large flower heads with medium, large individual flowers.

Seed for 1000 plants.....	\$10.00
Seed for 500 plants.....	5.00

### Cremer's Prize Strain

This strain has been greatly improved by the originator — has small foliage that is wilt-proof with tremendous heads of flowers of the brightest colors.

Tr. Pkt. \$1.50	1/32 oz. \$4.00	1/16 oz. \$7.50
-----------------	-----------------	-----------------

Positively do not use soil that was previously used for Mums and especially so if your Mums were affected with Verticillium wilt or Seidewitz disease. CINERARIAS are attacked by this wilt which is a soil borne fungus. It will cause the lower leaves to wilt and die and then gradually kill the entire plant. The only prevention for this trouble is to use new field soil from seed flats to finished pot. If you do use old chrysanthemum soil be sure to sterilize it. To be on the safe side it is recommended to steam sterilize soil before using.

## Centaurea

Listed below are the finest improved Florist strains of Centaurea Cyanus. The flowers are large, fully double and the colors intensified. The long stems of this strain make them excellent for cut flower purposes.

# Delphinium PACIFIC STRAIN

VETTERLE & REINELT

This is the finest strain of Delphinium yet introduced. From our personal observations in the field, we find this has unquestionably proven to be the leader in Delphiniums of the better type. The flowers are immense in size, well set on strong, straight stems, do not shatter, and are 40 to 90% mildew resistant. July or

August sowing and transplanting into the field during the fall will produce an early crop with large spikes. Delphiniums require a well drained soil, neutral in reaction. January sowing will produce flowers during the summer.

## Astolat Series (NOVELTY)

This series of entirely novel shades in Delphinium has been worked on for quite a number of years. The color variations extend from **Pale Blush through all shades of Lilac Pink to Deep Raspberry Rose** with large brown, fawn and black bees for contrast.

Tr. Pkt. \$2.00

1/8 oz. \$4.00

1/4 oz. \$7.00

### BLACK KNIGHT

The individual florets, 2 to 3" in diameter, are **Dark Purple**, beautifully rounded form with heavy velvety texture. Very large well formed spikes.

### BLUE BIRD SERIES

This series can be recommended as being the **clearest medium blues with white bees**. They carry well formed round flowers 2 1/4 inches in diameter on very long, graceful spikes.

### BLUEJAY SERIES

Color striking. **Clear medium to dark blue**. Very intense and alive with contrasting bee.

### CAMELIARD SERIES

A **pure lavender self**, with **white bee**, individual flowers, are very round and flat. Excellent growing habits.

### GALAHAD SERIES

Flowers **Clear White**, averaging three inches in diameter, pyramidal spikes, good branching habit, strong whippy stems with a high percentage of mildew resistance.

### GUINEVERE SERIES

**Light Pink Lavender self** with **white bee**. Individual florets 2 1/2 to 3 inches in diameter. For cut flowers and show purposes. Mildew resistance—50 to 70%.

### KING ARTHUR SERIES

**Brilliant Royal Violet** with large **white bee**. Individual florets 2 1/2 inches in diameter. Excellent for cut flowers. Mildew resistance from 80 to 90%.

### LANCELOT SERIES

**Clear Lilac self** with **white bee**.

### PERCIVAL SERIES

A companion to the Galahad Series. Large **glistening white flowers** with strongly contrasting **black bee**.

### ROUND TABLE SERIES

This represents **all the color combinations of the Knights and their Ladies** which will eventually be introduced. Some three hundred different crosses were used to make up this group.

### SUMMER SKIES SERIES

**Clearest Light Blue** with white bee. Individual florets 2 to 2 1/2 inches in diameter. Ideal for cut flower purposes. Mildew resistance—40 to 60%.

### ALL COLORS MIXED

A blend containing all named colors mentioned above.

Prices for all of the above varieties except where noted:

# Cyclamen Seed

## Gloeckner STRAIN

This strain is produced by one of the foremost Cyclamen specialists in Europe and is considered outstanding.

We feel that the new colors offered in this strain are vitally necessary if renewed interest is to be aroused in the production and use of Cyclamen.

An asterisk has been placed before the colors which are considered the best of the newer shades. The standard shades are also included and are considered exceptional.

## DAUERHEIM STRAIN

This strain is compact, free flowering and matures early. Tests have shown that it is more disease resistant and will do very well under conditions here in the States. The foliage is of medium size, the blooms well proportioned are particularly large, the white and white with eye often measuring six inches across.

Dauerheim's have selected and improved this strain for a number of years and in their trials have found this strain to be superior.

	Per 100	Per 1000

## DAHLIAS

These are easy to raise from seed and are overlooked by many florists. Vast improvements have been made in these strains which come remarkably true to type and height. They are early flowering, blooming profusely the same year they are sown.

For small pot plant sales in the spring the seed should be started during January or February. To produce four inch pot plants for Mother's Day sow the seed in November.

	Tr. Pkt.	Oz.
Unwin's Dwarf Ideal Bedding Mixed — Early flowering semi-double, 18 inches, in a wide range of colors	\$ .50	\$2.50
Coltness Hybrids—Dwarf single type, very free flowering, height 2 feet, choice mixed colors	.50	1.50

<b>Mixed</b> —Named colors .....	.25	1.10	11.00

Larkspur seed may be sown directly in the open in the fall and will flower the following spring. There are two distinctly different methods used and each have a number of successful supporters. The first method is to sow the seed fairly early in the season about August 15th to September 15th. The small Larkspur seedlings will be sufficiently large enough when cold weather

sets in to winter over when given a light mulch. The other method employed is to sow the seed in rows in late October or early November so that it will not germinate until early next spring. This crop of Larkspur will generally come in shortly after Delphinium Belladonna.

# Marigold

## GIGANTEA

A remarkable new sweet scented, robust growing extremely large flowered type, ideal for show purposes, florist use and garden decoration. It has also been tested and found good for greenhouse culture.

Blue .....	1.50	2.50	4.50
Wyaston Wonder — Bright crimson.....	1.50	2.50	4.50

**PRIMULA**

**MALACOIDES "SPRINGTIME"**

SPRINGTIME is one of the finest Malacoides ever offered. This color is an attractive SALMON pink which does not fade with age. The flower stems are strong and support a profusion of good sized blooms; and unlike many other varieties of Malacoides, the foliage has good texture and is fairly resistant to rot. Thus the outstanding features of this variety are its pleasing salmon pink color, compact habit of growth and excellent keeping quality.

Seed sown in June will make good flowering plants for January. September sown seed will produce good plants for early Spring; while later sowing can be sown into small plants usable in combinations.

TRADE PACKET — \$2.00

**ERIKSSON'S MALACOIDES**

	Tr. Pkt.	1/64 oz.
Glory of Riverside Imp. — True rose pink. Strong grower .....	\$1.00	\$2.75

Farinacea Royal Blue — More intense color than Blue Bedder .....	.75	1.50	5.00

# Stocks

Stocks are very satisfactory for Winter and Spring flowering. Sowing the seed in August and benching in October, the first flowers may be cut before Christmas if additional light (40-60 watt lamps spaced 5 feet) is used. Without this aid the crop will come into flower in January. Continuity of bloom may be obtained by successive sowings. This non-branching type, which has come into general use, should be planted 3 inches in the row and 6 inches between rows, producing a single stem. The branching types should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

Flowering of stocks only occurs when the temperatures are below 60 degrees for the greater part of the night. To secure the greatest percentage of doubling the largest and most vigorous plants should be selected.

The CHRYSANTHEMUM-STOCK planting succession is dependable and profitable. Refer to Gloeckner's 1951 Chrysanthemum Manual for a complete listing of varieties.

## GIANTS OF CALIFORNIA

### (Branching)

The Giants of California can also be grown similarly to the non-branching type. When grown this way the side shoots should be removed. For the retail grower the branching types are gaining popularity. These should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

### CUTHBERTSON STRAIN SPRING FLOWERING

This new class of Sweet Peas has taken the place of the "Spring Flowering" types previously offered. Indoors, Seed should be sown November 1st, and such planting will start to bloom in April. **The Cuthbertson Class is recommended for sowing after November 1, and not earlier because they need the stronger Spring sun to bloom.**

They are exceptionally successful out of doors. In the North, they flower two weeks later than the Early Flowering, and two to three weeks earlier than the Summer Flowering.

	½ oz.	1 oz.	¼ lb.
Billy—Bright cerise rose on salmon	\$ .35	\$ .65	\$2.00
Carol—Strong growing clear pink	.35	.65	2.00
Coline—Vigorous sunproof scarlet	.35	.65	2.00
Danny—Navy blue .....	.35	.65	2.00
Evelyn—Salmon cream pink .....	.35	.65	2.00
Frank G.—Strong growing lavender	.35	.65	2.00

	½ oz.	1 oz.	¼ lb.
Hazel—Light blue .....	\$ .35	\$ .65	\$2.00
Janet—A pure black seeded white.	.35	.65	2.00
Jessie — Wavy flowers of clear satin mauve .....	.35	.65	2.00
Lois — Rose pink on white back- ground .....	.35	.65	2.00
Tommy—Clear medium blue .....	.35	.65	2.00

**SCHIZANTHUS**

Late summer sowing planted after early Chrysanthemums should flower in March. If additional light is used from October 25, blooming will start in January.

Tr. Pkt. 1/4 oz.

**Dr. Badger's Hybrids**—A brightly colored large flowered strain of medium height. Suitable either for pots or cutting ..... \$ .50 \$1.25

**Bridal Veil** — Pure white ..... .50 1.25

**Brilliant Blend**—Dark, bright colors, suitable for cutting. If properly pinched will make a good plant ..... .50 1.25

**STATICE SUWOROW**

**Russian or Rat Tail Statice**

Tr. Pkt. Oz.

A very ornamental variety with long graceful spikes of rose pink flowers. Seed sown early outdoors will bloom in July. For the greenhouse seed started in October and spread on light shallow soil will flower from February to May. 45 degrees is best temperature ..... \$ .25 \$1.35

**SHAMROCK**

Tr. Pkt. 1/4 oz. Oz.

**True Irish** ..... \$ .20 \$ .35 \$1.20

**STATICE SINUATA**

Tr. Pkt. Oz.

**Mixed** ..... \$ .15 \$1.00

**TITHONIA—MEXICAN SUN FLOWER  
(Early Flowering Strain)**

Tr. Pkt. Oz.

**Speciosa** — Bright orange vermilion resembling large single African Marigolds. A good cut flower. Start early to get outdoor bloom by mid-summer ..... \$ .25 \$ .75  
**Torch (New)**—Orange red flowers. Plants grow waist high and flower from August until frost ..... .50 3.50

**TORENIA**

Tr. Pkt. 1/16 oz. 1/8 oz.

**Fournieri** — Rich combination of deep blue with violet splotches on lip. Good for Combinations, Pot Plants and Bedding ..... \$ .50 \$ .75 \$1.25

# Verbena

## Gloeckner STRAIN MIXED

Here too is a fine mixture of dwarf Verbena making a fine companion for the Phlox for spring bedding plant sales. The plants are very dwarf in habit and have a splendid range of colors containing many of the eyed types through the mixture.

This is an excellent dwarf Verbena especially adapted to growing in 2 1/4" and 3" pots.

This is the first time we have been able to offer this seed in quantity.

Tr. Pkt.	\$1.00	1/4 oz.	\$2.00	1/2 oz.	\$3.50	Oz.	\$6.00
----------	--------	---------	--------	---------	--------	-----	--------

## HYBRIDA MAMMOTH

<b>Repens White</b> — 6", fine rock plant .....	.25	2.50

**HEUCHERA**

One of the most desired of the smaller growing plants. The plants of Sanguinea are compact, bushy and grow in tufts with flower stems about 1½ feet high, blooming in mid-summer.

	Tr. Pkt.	1/8 oz.
<b>Sanguinea</b> — Fine for cutting .....	\$ .50	\$3.00

**HOLLYHOCK — CHATERS DOUBLE**

<b>Black Gem</b> — Maroon .....	\$ .30	\$1.50
<b>Chamois</b> .....	.30	1.50
<b>Enchantress</b> — Deep rose .....	.30	1.50
<b>Fire King</b> — Scarlet .....	.30	1.50
<b>Golden Drop</b> — Sulphur yellow .....	.30	1.50
<b>Newport Pink</b> .....	.30	1.50
<b>Salmon Rose</b> .....	.30	1.50
<b>Virgin Queen</b> — White .....	.30	1.50
<b>Mixed</b> .....	.30	1.50

**IBERIS**

Low-growing plant that grows about 9 to 12" tall, and spreads out making mats which are covered with flat dense clusters of flowers from the end of April through June.

	Tr. Pkt.	Oz.
<b>Gibraltarica</b> — Lilac .....	\$ .25	\$1.40
<b>Sempervirens</b> — White .....	.50	4.50

**LAVANDULA — SWEET LAVENDER**

	Tr. Pkt.	Oz.
<b>Munstead's Strain</b> — Well-known fragrant hardy perennial. Always in good demand .....	\$ .35	\$3.50

**LIATRIS**

Long spikes 4 to 5 feet tall of rosy purple. Flowers during August and September.

	Tr. Pkt.	Oz.
<b>Pycnostachya</b> — Rosy purple. Fine for cutting .....	\$ .35	\$3.00

**LINUM**

	Tr. Pkt.	Oz.
<b>Perenne</b> — (Flax) — Blue. 1½ ft. tall .....	\$ .15	\$ .50
<b>Flavum</b> — Yellow. 2 ft. tall .....	.25	2.75

*Gypsophila Repens*

*Scabiosa Caucasia*

**LYCHNIS**

**Chalcedonica**—Flowers in June. Produces several flower stems over 3 ft. tall with immense heads of vermilion scarlet flowers ..... **\$ .25 \$1.50**

**MYOSOTIS**

**Alpestris Victoria** — Grows about 6" tall and is compact in growth. Produces its clear blue flowers beginning in April..... **\$ .35 \$3.00**  
**Palustris Semperflorens**—Begins blooming about May and continues until fall ..... **.35 3.00**

**POPPY**

Dwarf plants growing about 12 inches tall that bloom all summer if the flowers are kept picked.

**Sunbeam Mixed** — Light shades, large flowers ..... **\$ .35 \$2.25**

**PRIMULA**

Hardy Primroses are showy plants that have small dainty flowers during April. The plants grow about 6 to 8 in. tall.
